

## CSC 4998/6999 Project Proposal

**Group No: 10**

**Project Title:** Tourist Guide

**Group Members:**

Koushik Nallani

Laxmi Sravya Sivapuram

Viet Dang

Veera Supraja Koppisetty

Venkata Surya Sandeep Katuri

**Project Idea:**

The main objective of this application is to provide information about a place a person wishes to travel. By using this, we try to reduce the efforts a user puts in searching for multiple apps for the information as everything will be accessible through a single and simple application.

It lets us know about:

- The weather forecast of a place which includes the prediction for the next 7 days
- Places of interest which can be located on the map along with the place's address
- Accommodations and suggestions which are near by the specified place
- Currency conversion module which makes it easier for the user to convert their home currency to other currency
- Restaurants in the proximity of that location with customer ratings and reviews.
